

Brisa Lázaro

Junior QA Engineer

brisa.lazaroc@gmail.com +34 648 008 592 [linkedin.com/in/brisa-lazaro](https://www.linkedin.com/in/brisa-lazaro)

SKILLS

Testing

- Manual, Exploratory & Functional Testing
- Regression, E2E & Risk-Based Testing
- API Testing, Bug Reporting & UX Validation

Tools

- Cypress · Postman · Jira
- Chrome DevTools · SQL
- Git · GitHub

Development

- JavaScript · TypeScript
- React · Redux · Jest

AI & Modern QA

- AI-Assisted Testing
- Prompt Engineering for QA
- Risk Analysis with AI
- AI-Based Edge Case Discovery

LANGUAGES

Spanish — Native
English — Intermediate (B1)
Catalan — Beginner

EDUCATION

QA Engineer

Self-Taught

Web Developer

42 Barcelona

Business Administration

UPAEP

PROFILE

Frontend Developer transitioning into QA with Agile experience and hands-on testing across the development cycle.

My technical background helps me understand how products are built and communicate issues with precision. My growing QA focus drives me to identify risks, uncover edge cases, and advocate for quality.

Currently exploring AI-assisted workflows for test design, exploratory testing, and risk analysis.

QA LEARNING & COMMUNITY PROJECTS

Self-Learning & Hands-On Practice

2025 – Present

- Software Testing courses, exploratory and risk-based testing, API testing.
- Defect reporting, bug investigation, test design and documentation.

Community Project: Neulygron

- Exploratory testing, usability and functionality issues, security evaluation.
- Continuous feedback and risk assessment to support release confidence.
- AI-powered workflows for test ideas, edge cases, and requirement analysis.

PROFESSIONAL EXPERIENCE

Frontend Developer

[Bikup Tech Solutions](#) · 2022 – 2024

- Participated in unit testing, E2E testing, 3 Amigos and ETS sessions in Agile teams.
- Used Feature Flags to support safer releases and reduce deployment risks.
- Identified defects and validated functionality throughout development.

Restaurant Manager

[El Pulpo](#) · 2017 – 2021

- Coordinated teams and resolved operational issues in fast-paced environments.
- Built skills in attention to detail, communication, and process improvement — now applied to QA.

WHAT I BRING

Quality Mindset

Question assumptions and identify risks before they reach users.

Technical Background

Frontend experience to collaborate with engineers and report issues precisely.

AI-Augmented Testing

Using AI tools to improve test design, discover scenarios, and speed up investigation.

Continuous Learning

Hands-on practice, community projects, and real-world experimentation.
